

# HUS4-MAX

Safety information for 2-Component-products

Issue date: 02/05/2023 Revision date: 02/05/2023

### **SECTION 1: Kit identification**

### **1.1 Product identifier**

Product name

HUS4-MAX

Version: 1.0

Product code

### 1.2 Details of the supplier of the Safety information for 2-Component-products

Hilti Bahrain W.L.L Warehouse No. 23 & 25, Gate 285, Road 4306 Area 343, Mina Salman P.O. Box 11401 Manama T +973 17811675 hiltibahrain@hilti.com - https://www.hilti-me.com/

## **SECTION 2: General information**

Storage

Storage temperature : 5 - 25 °C

A SDS for each of these components is included. Please do not separate any component SDS from this cover page

This Kit should be handled in accordance with good laboratory practices and appropriate personal protective equipment should be used

### **SECTION 3:**

### **Classification of the Product**

Org. Perox. F	H242
Acute Tox. 5 (Oral)	H303
Eye Irrit. 2	H319
Skin Sens. 1	H317
Aquatic Acute 1	H400
Aquatic Chronic 1	H410

### Label elements

Labelling according to the United Nations GHS Hazard pictograms (GHS UN)	CHS02 CHS07 CHS09
Signal word (GHS UN)	Warning
Hazardous ingredients	2-Propenoic acid, 2-methyl-, monoester with 1,2-propanediol (A); 2-Propenoic acid, 2-methyl-, 1,4-butanediyl ester (A); 4-tert-butylpyrocatechol (A); dibenzoyl peroxide (B)
Hazard statements (GHS UN)	H242 - Heating may cause a fire. H317 - May cause an allergic skin reaction. H319 - Causes serious eye irritation. H410 - Very toxic to aquatic life with long lasting effects.
Precautionary statements (GHS UN)	P210 - Keep away from heat, hot surfaces, open flames, sparks. – No smoking. P280 - Wear eye protection, protective clothing, protective gloves.
02/05/2023 EN (English)	1/22

# **HUS4-MAX**

Safety information for 2-Component-products

P262 - Do not get in eyes, on skin, or on clothing. P305+P351+P338 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. P302+P352 - IF ON SKIN: Wash with plenty of soap and water. P337+P313 - If eye irritation persists: Get medical advice/attention. P333+P313 - If skin irritation or rash occurs: Get medical advice/attention.

### Additional information

Foil capsule contains: Component A: Urethane methacrylate resin Component B: Dibenzoyl peroxide, phlegmatized

A B				
Name	General description	Quantity	Unit	Classification according to the United Nations GHS
HUS4-MAX, A		1	pcs (pieces)	Acute Tox. 5 (Oral), H303 Skin Sens. 1, H317
HUS4-MAX, B		1	pcs (pieces)	Org. Perox. F, H242 Eye Irrit. 2, H319 Skin Sens. 1, H317 Aquatic Acute 1, H400 Aquatic Chronic 1, H410

### **SECTION 4: General advice**

General advice

For professional users only

General measures	Spilled material may present a slipping hazard
Environmental precautions	Prevent entry to sewers and public waters Notify authorities if liquid enters sewers or public waters
Storage conditions	Keep container tightly closed. Keep cool. Protect from sunlight. Avoid contact with : Air Expiry date: See date printed on box and capsule. Do not use if expiry date has been exceeded! Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
Precautions for safe handling	Wear personal protective equipment Avoid contact with skin and eyes Avoid breathing dust, vapours. Wash hands and other exposed areas with mild soap and water before eating, drinking or smoking and when leaving work Provide good ventilation in process area to prevent formation of vapour Prevent the build-up of electrostatic charge Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
Methods for cleaning up	Stop leak without risks if possible Use non-sparking tools Absorb and/or contain spill with inert material, then place in suitable container. This material and its container must be disposed of in a safe way, and as per local legislation
For containment	Collect spillage.
Incompatible materials	Strong acids Strong bases Activator reducing agents solid salts and solutions containing heavy metals

# HUS4-MAX

Safety information for 2-Component-products

### SECTION 6: First aid measures

First-aid measures after eye contact	Rinse immediately with plenty of water Remove contact lenses, if present and easy to do. Continue rinsing. Obtain medical attention if pain, blinking or redness persists
First-aid measures after ingestion	Rinse mouth Get medical advice/attention. Do not induce vomiting Obtain emergency medical attention
First-aid measures after inhalation	Remove person to fresh air and keep comfortable for breathing. Allow affected person to breathe fresh air Allow the victim to rest
First-aid measures after skin contact	Wash contaminated clothing before reuse. Wash with plenty of water/… If skin irritation or rash occurs: Get medical advice/attention.
First-aid measures general	Take off immediately all contaminated clothing. Never give anything by mouth to an unconscious person If you feel unwell, seek medical advice (show the label where possible)
Symptoms/effects after eye contact	May cause severe irritation
Symptoms/effects after skin contact	May cause an allergic skin reaction.
Other medical advice or treatment	Treat symptomatically

SECTION 7: Fire fighting measures	
Firefighting instructions	Use water spray or fog for cooling exposed containers Exercise caution when fighting any chemical fire Prevent fire fighting water from entering the environment
Protection during firefighting	Self-contained breathing apparatus Do not enter fire area without proper protective equipment, including respiratory protection
Hazardous decomposition products in case of fire	Thermal decomposition generates : Carbon dioxide Carbon monoxide

### **SECTION 8: Other information**

No data available

according to the United Nations GHS (Rev. 9, 2021) Issue date: 02/05/2023 Revision date: 02/05/2023 :

Organic Peroxides, Type F	H242	Expert judgement
Serious eye damage/eye irritation, Category 2	H319	Calculation method
Skin sensitisation, Category 1	H317	Calculation method
Hazardous to the aquatic environment – Acute Hazard, Category 1	H400	Calculation method
Hazardous to the aquatic environment – Chronic Hazard, Category 1	H410	Calculation method
Full text of H-statements: see section 16		

2.2. GHS Label elements, including precautionary statements

### Labelling according to the United Nations GHS

Hazard pictograms (GHS UN)

Signal word (GHS UN) Hazardous ingredients Hazard statements (GHS UN)

H242 - Heating may cause a fire

H317 - May cause an allergic skin reaction

H319 - Causes serious eye irritation

H410 - Very toxic to aquatic life with long lasting effects

according to the United Nations GHS (Rev. 9, 2021)

Precautionary statements (GHS UN)	P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources
	No smoking.
	P280 - Wear eye protection, protective clothing, protective gloves.
	P262 - Do not get in eyes, on skin, or on clothing.
	P305+P351+P338 - IF IN EYES: Rinse cautiously with water for several minutes. Remove
	contact lenses, if present and easy to do. Continue rinsing.
	P302+P352 - IF ON SKIN: Wash with plenty of water.
	P337+P313 - If eye irritation persists: Get medical advice, medical attention.
	P333+P313 - If skin irritation or rash occurs: Get medical advice, medical attention.

### 2.3. Other hazards which do not result in classification

No additional information available

# **SECTION 3: Composition/information on ingredients**

### 3.1. Substances

Not applicable

### 3.2. Mixtures

Name	Product identifier	%	Classification according to the United Nations GHS
dibenzoyl peroxide	CAS-No.: 94-36-0	10 – 25	Organic Peroxides, Type B, H241 Serious eye damage/eye irritation, Category 2, H319 Skin sensitisation, Category 1, H317 Hazardous to the aquatic environment – Acute Hazard, Category 1, H400 (M=10) Hazardous to the aquatic environment – Chronic Hazard, Category 1, H410 (M=10)

Full text of H-statements: see section 16

4.1. Description of necessary first-aid	measures
First-aid measures general	Take off immediately all contaminated clothing. Never give anything by mouth to an unconscious person. If you feel unwell, seek medical advice (show the label where possible).
First-aid measures after inhalation	Remove person to fresh air and keep comfortable for breathing. Allow affected person to breathe fresh air. Allow the victim to rest.
First-aid measures after skin contact	Wash contaminated clothing before reuse. Wash with plenty of water/ If skin irritation of rash occurs: Get medical advice/attention.
First-aid measures after eye contact	Rinse immediately with plenty of water. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.
First-aid measures after ingestion	If swallowed, seek medical advice immediately and show this container or label.

Symptoms/effects after skin contact	May cause an allergic skin reaction.
Symptoms/effects after eye contact	Causes serious eye irritation.

### 4.3. Indication of immediate medical attention and special treatment needed, if necessary

Treat symptomatically.

# HUS4-MAX, B

Safety Data Sheet

according to the United Nations GHS (Rev. 9, 2021)

SECTION 5: Fire-fighting measures	
5.1. Suitable extinguishing media	
Suitable extinguishing media Unsuitable extinguishing media	Water spray. Carbon dioxide. Dry powder. Alcohol-resistant foam. Do not use a heavy water stream.
5.2. Specific hazards arising from the chemi	ical
Fire hazard	May form flammable vapour-air mixtures. May decompose violently at elevated temperatures or in a fire. Burns vigorously. Insoluble in water. Contact with alkalis or acids may cause dangerous decomposition. The products of combustion or self-accelerating decomposition may be toxic by inhalation. Will float and can be reignited on water surface.
Explosion hazard	Vapours may form explosive mixture with air.
Reactivity in case of fire	Decomposition products may be a hazard to health.
Hazardous decomposition products in case of fire	Formation of toxic gases is possible during heating or in case of fire. Corrosive vapours. Thermal decomposition can lead to the release of irritating gases and vapours.
5.3. Special protective actions for fire-fighte	rs
Firefighting instructions	Use water spray or fog for cooling exposed containers. Exercise caution when fighting any chemical fire. Prevent fire fighting water from entering the environment.
Protection during firefighting	Self-contained breathing apparatus. Do not enter fire area without proper protective equipment, including respiratory protection.
SECTION 6: Accidental release mea	sures
6.1. Personal precautions, protective equipr	nent and emergency procedures
General measures	Spilled material may present a slipping hazard.

6.1.1. For	r non-emergenc	v personnel

6.1.1. For non-emergency personner	
Protective equipment	Wear recommended personal protective equipment.
Emergency procedures	Evacuate unnecessary personnel. No flames, no sparks. Eliminate all sources of ignition.
	Explosive vapour/air mixtures may be formed.
6.1.2. For emergency responders	
Protective equipment	Use personal protective equipment as required. Equip cleanup crew with proper protection.
Emergency procedures	Ventilate area.

### 6.2. Environmental precautions

Prevent entry to sewers and public waters. Notify authorities if liquid enters sewers or public waters.

## 6.3. Methods and materials for containment and cleaning up

For containment	Collect spillage.
Methods for cleaning up	Stop leak without risks if possible. Use non-sparking tools. Absorb and/or contain spill with
	inert material, then place in suitable container. This material and its container must be
	disposed of in a safe way, and as per local legislation.
Other information	Dispose of materials or solid residues at an authorized site.

SECTION 7: Handling and storage

### 7.1. Precautions for safe handling

Precautions for safe handling

Hygiene measures

Wear personal protective equipment. Avoid contact with skin and eyes. Avoid breathing dust, vapours. Wash hands and other exposed areas with mild soap and water before eating, drinking or smoking and when leaving work. Provide good ventilation in process area to prevent formation of vapour. Prevent the build-up of electrostatic charge. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Do not eat, drink or smoke when using this product. Always wash hands after handling the product. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reuse.

# HUS4-MAX, B

Safety Data Sheet

according to the United Nations GHS (Rev. 9, 2021)

7.2. Conditions for safe storage, including any incompatibilities			
Technical measures	Comply with applicable regulations.		
Storage conditions	Keep container tightly closed. Keep cool. Protect from sunlight. Avoid contact with : Air.		
	Store away from other materials. Expiry date: See date printed on box and capsule. Do not use if expiry date has been exceeded!.		
Incompatible materials	Strong acids. Strong bases. Activator. reducing agents. solid salts and solutions containing heavy metals.		
Heat and ignition sources	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.		
Storage temperature	5 – 25 °C		

### **SECTION 8: Exposure controls/personal protection**

### 8.1. Control parameters

No additional information available

### 8.2. Appropriate engineering controls

Appropriate engineering controls	Ensure adequate ventilation.
Environmental exposure controls	Avoid release to the environment.
Consumer exposure controls	Avoid contact during pregnancy/while nursing.
Other information	Do not eat, drink or smoke during use.

### 8.3. Individual protection measures, such as personal protective equipment (PPE)

Hand protection

Wear protective gloves. The permeation time is not the maximum wearing time! Generally speaking, it must be reduced. Contact with either mixtures of substances or different substances may shorten the protective function's effective duration.

Туре	Material	Permeation	Thickness (mm)		Penetration		Standard
Disposable gloves	Nitrile rubber (NBR)	6 (> 480 minutes)	minutes) 0,12				EN ISO 374
Eye protection         Wear security glasses which protect from splashes							
Type Fie		Field of application	Characteristics		s	Standa	ard
Safety glasses Droplet			clear		EN 166	6, EN 170	
Skin and body protection Long sleeved protective clothing							

Skin and body protection

### 8.4. Exposure limit values for the other components

No additional information available

## **SECTION 9: Physical and chemical properties**

### 9.1. Basic physical and chemical properties

Physical state	Liquid
Colour	white.
Odour	characteristic.
Odour threshold	Not available
Melting point	Not available
Freezing point	Not available
Boiling point	Not available
Flammability	Not available
Lower explosion limit	Not available

according to the United Nations GHS (Rev. 9, 2021)

Upper explosion limit	Not available
Flash point	Not available
Auto-ignition temperature	Not available
Decomposition temperature	Not available
SADT	70 °C
pH	≈7
pH solution	Not available
Viscosity, kinematic (calculated value) (40 °C)	0 mm²/s
Partition coefficient n-octanol/water (Log Kow)	Not available
Vapour pressure	23.4 hPa
Vapour pressure at 50°C	Not available
Density	1.03 g/cm <sup>3</sup>
Relative density	Not available
Relative vapour density at 20°C	Not available
Solubility	insoluble in water.
Viscosity, dynamic	200 mPa·s
Particle size	Not applicable

### 9.2. Data relevant with regard to physical hazard classes (supplemental)

Explosive properties

Product is not explosive

### **SECTION 10: Stability and reactivity**

#### 10.1. Reactivity

Stable under recommended handling and storage conditions (see section 7).

#### 10.2. Chemical stability

Stable under normal conditions. Stable under recommended handling and storage conditions (see section 7).

#### 10.3. Possibility of hazardous reactions

Can form explosive mixtures with air.

#### 10.4. Conditions to avoid

May decompose violently at elevated temperatures or in a fire. Burns vigorously. Insoluble in water. Contact with alkalis or acids may cause dangerous decomposition. The products of combustion or self-accelerating decomposition may be toxic by inhalation. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

#### 10.5. Incompatible materials

Strong acids. Strong bases. Activator. reducing agents. solid salts and solutions containing heavy metals.

#### 10.6. Hazardous decomposition products

Toxic and corrosive gases are released. Toxic and corrosive fumes are released.

## **SECTION 11: Toxicological information**

11.1.	Information	on	toxicological	effects

Acute toxicity (oral)	Not classified	
Acute toxicity (dermal)	Not classified	
Acute toxicity (inhalation)	Not classified	
Skin corrosion/irritation	Not classified	
	pH: ≈ 7	
Serious eye damage/irritation	Causes serious eye irritation.	
	pH: ≈ 7	
Respiratory or skin sensitisation	May cause an allergic skin reaction.	
Germ cell mutagenicity	Not classified	
Carcinogenicity	Not classified	
Reproductive toxicity	Not classified	

according to the United Nations GHS (Rev. 9, 2021)

STOT-single exposure	Not classified	
STOT-repeated exposure	Not classified	
Aspiration hazard	Not classified	
HUS4-MAX, B		
Viscosity, kinematic	0 mm²/s	

SECTION 12: Ecological information	
12.1. Toxicity	
Hazardous to the aquatic environment, short-term (acute)	Very toxic to aquatic life.
Classification procedure (Hazardous to the aquatic environment, short–term (acute))	Calculation method
Hazardous to the aquatic environment, long-term	Very toxic to aquatic life with long lasting effects.
Classification procedure (Hazardous to the aquatic environment, long–term (chronic))	Calculation method
dibenzoyl peroxide (94-36-0)	
LC50 - Fish [2]	0.0602 mg/l (96h; Oncorhynchus mykiss; ECHA)
EC50 - Crustacea [1]	0.11 mg/l (OECD 202: Daphnia sp. Acute Immobilisation Test, 48 h, Daphnia magna, Static system, Fresh water, Experimental value, GLP)
ErC50 algae	0.0711 mg/l (OECD 201: Alga, Growth Inhibition Test, 72 h, Pseudokirchneriella subcapitata, Static system, Fresh water, Experimental value, GLP)
NOEC (acute)	0.0316 mg/l (96h; Oncorhynchus mykiss; ECHA)
NOEC chronic fish	0.001 mg/l
12.2. Persistence and degradability	
HUS4-MAX, B	
Persistence and degradability	No additional information available
dibenzoyl peroxide (94-36-0)	
Persistence and degradability	Readily biodegradable in water. Not established. May cause long-term adverse effects in the environment.
12.3. Bioaccumulative potential	
HUS4-MAX, B	
Bioaccumulative potential	No additional information available
dibenzoyl peroxide (94-36-0)	
Partition coefficient n-octanol/water (Log Kow)	3.71
Bioaccumulative potential	Low bioaccumulation potential (Log Kow < 4).
12.4. Mobility in soil	
HUS4-MAX, B	
Mobility in soil	No additional information available
dibenzoyl peroxide (94-36-0)	
Surface tension	No data available (test not performed)
Organic Carbon Normalized Adsorption Coefficient (Log Koc)	3.8 (log Koc, OECD 121: Estimation of the Adsorption Coefficient (Koc) on Soil and on Sewage Sludge using High Performance Liquid Chromatography (HPLC), Experimental value)
02/05/2023	EN (English) 9/2

# HUS4-MAX, B

# Safety Data Sheet

according to the United Nations GHS (Rev. 9, 2021)

dibenzoyl peroxide (94-36-0)		
Ecology - soil	Low potential for mobility in soil.	
12.5. Other adverse effects		
Ozone	Not classified	
Other adverse effects	No additional information available	

SECTION 13: Disposal consideration	ons
13.1. Disposal methods	
Regional legislation (waste)	Disposal must be done according to official regulations.
Product/Packaging disposal recommendations	After curing, the product can be disposed of with household waste Full or only partially emptied cartridges must be disposed of as special waste in accordance with official regulations. Packaging contaminated by the product : Dispose in a safe manner in
	accordance with local/national regulations.
Ecology - waste materials	Avoid release to the environment.

according to the United Nations GHS (Rev. 9, 2021)

### 2.3. Other hazards which do not result in classification

No additional information available

## **SECTION 3: Composition/information on ingredients**

### 3.1. Substances

Not applicable

#### 3.2. Mixtures

Name	Product identifier	%	Classification according to the United Nations GHS
2-Propenoic acid, 2-methyl-, 1,4-butanediyl ester	CAS-No.: 2082-81-7	60 – 80	Acute toxicity (oral) Not classified Skin sensitisation, category 1B, H317
1,1'-(p-tolylimino)dipropan-2-ol	CAS-No.: 38668-48-3	1 – 2.5	Acute toxicity (oral), Category 2, H300 Serious eye damage/eye irritation Category 2A, H319 Hazardous to the aquatic environment – Acute Hazard, Category 3, H402 Hazardous to the aquatic environment – Chronic Hazard, Category 3, H412
2-Propenoic acid, 2-methyl-, monoester with 1,2- propanediol	CAS-No.: 27813-02-1	0.1 – 1	Flammable liquids Not classified Acute toxicity (oral) Not classified Serious eye damage/eye irritation, Category 2A, H319 Skin sensitisation, Category 1, H317
4-tert-butylpyrocatechol	CAS-No.: 98-29-3	0.1 – 1	Acute toxicity (oral), Category 4, H302 Acute toxicity (dermal), Category 3, H311 Skin corrosion/irritation, Category 1B, H314 Skin sensitisation, Category 1, H317 Hazardous to the aquatic environment – Acute Hazard, Category 1, H400 Hazardous to the aquatic environment – Chronic Hazard, Category 2, H411

Full text of H-statements: see section 16

### **SECTION 4: First-aid measures**

### 4.1. Description of necessary first-aid measures

First-aid measures general

Take off immediately all contaminated clothing. Never give anything by mouth to an unconscious person. If you feel unwell, seek medical advice (show the label where possible).

# HUS4-MAX, A

Safety Data Sheet

according to the United Nations GHS (Rev. 9, 2021)

First-aid measures after inhalation	Remove person to fresh air and keep comfortable for breathing. Allow affected person to breathe fresh air. Allow the victim to rest.
First-aid measures after skin contact	Wash contaminated clothing before reuse. Wash with plenty of water/ If skin irritation or rash occurs: Get medical advice/attention.
First-aid measures after eye contact	Rinse immediately with plenty of water. Remove contact lenses, if present and easy to do. Continue rinsing. Obtain medical attention if pain, blinking or redness persists.
First-aid measures after ingestion	Rinse mouth. Get medical advice/attention. Do not induce vomiting. Obtain emergency medical attention.
4.2 Most important symptoms/effects	acute and delayed

4.2. Most important symptoms/enects, acut	e anu uelayeu
Symptoms/effects after skin contact	May cause an allergic skin reaction.
Symptoms/effects after eye contact	May cause severe irritation.

### 4.3. Indication of immediate medical attention and special treatment needed, if necessary

Treat symptomatically.

SECTION 5: Fire-fighting measures			
5.1. Suitable extinguishing media			
Suitable extinguishing media	Water spray. Carbon dioxide. Dry powder. Foam. Sand.		
Unsuitable extinguishing media	Do not use a heavy water stream.		
5.2. Specific hazards arising from the chemic	cal		
Hazardous decomposition products in case of fire	Thermal decomposition generates : Carbon dioxide. Carbon monoxide.		
5.3. Special protective actions for fire-fighter	'S		
Firefighting instructions	Use water spray or fog for cooling exposed containers. Exercise caution when fighting any chemical fire. Prevent fire fighting water from entering the environment.		
Protection during firefighting	Self-contained breathing apparatus. Do not enter fire area without proper protective equipment, including respiratory protection.		

SECTION 6: Accidental release measures			
6.1. Personal precautions, protective equipment and emergency procedures			
General measures	Spilled material may present a slipping hazard.		
6.1.1. For non-emergency personnel			
Emergency procedures	Evacuate unnecessary personnel.		
6.1.2. For emergency responders			
Protective equipment	Use personal protective equipment as required. Equip cleanup crew with proper protection.		
Emergency procedures	Ventilate area.		
6.2. Environmental precautions			
Prevent entry to sewers and public waters. Notify authorities if liquid enters sewers or public waters.			

6.3. Methods and materials for containment and cleaning up		
For containment	Collect spillage.	
Methods for cleaning up	This material and its container must be disposed of in a safe way, and as per local	
	legislation. Mechanically recover the product. Store away from other materials.	
Other information	Dispose of materials or solid residues at an authorized site.	

# HUS4-MAX, A

## Safety Data Sheet

according to the United Nations GHS (Rev. 9, 2021)

SECTION 7: Handling and sto	prage
7.1. Precautions for safe handling	
Precautions for safe handling	Wear personal protective equipment. Avoid contact with skin and eyes. Wash hands and other exposed areas with mild soap and water before eating, drinking or smoking and when leaving work. Provide good ventilation in process area to prevent formation of vapour.
Hygiene measures	Do not eat, drink or smoke when using this product. Always wash hands after handling the product. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reuse.
7.2. Conditions for safe storage, inc	luding any incompatibilities
Storage conditions	Keep cool. Protect from sunlight. Expiry date: See date printed on box and capsule. Do not use if expiry date has been exceeded!.
Incompatible products	Strong bases. Strong acids.
Incompatible materials	Sources of ignition. Direct sunlight.
Heat and ignition sources	Keep away from heat and direct sunlight.
Storage temperature	5 – 25 °C

### SECTION 8: Exposure controls/personal protection

#### 8.1. Control parameters

No additional information available

### 8.2. Appropriate engineering controls

Appropriate engineering controls	Ensure good ventilation of the work station.
Environmental exposure controls	Avoid release to the environment.
Consumer exposure controls	Avoid contact during pregnancy/while nursing.
Other information	Do not eat, drink or smoke during use.

### 8.3. Individual protection measures, such as personal protective equipment (PPE)

Hand protection	Wear protective gloves. The permeation time is not the maximum wearing time! Generally
	speaking, it must be reduced. Contact with either mixtures of substances or different
	substances may shorten the protective function's effective duration.

Туре	Material	Permeation	Thickn	ess (mm)	Penetration		Standard
Disposable gloves	Nitrile rubber (NBR)	ubber (NBR) 6 (> 480 minutes) 0,12 E		EN ISO 374			
Eye protection Wear security glasses which protect from splashes			ies				
Туре		Field of application	of application Characteristics Standard		ard		
Safety glasses Droplet		Droplet		clear		EN 166	6, EN 170

Skin and body protection

Long sleeved protective clothing

Personal protective equipment symbol(s)

### 8.4. Exposure limit values for the other components

No additional information available

## **SECTION 9: Physical and chemical properties**

### 9.1. Basic physical and chemical properties

according to the United Nations GHS (Rev. 9, 2021)

Odour	characteristic.
Odour threshold	Not available
Melting point	Not available
Freezing point	Not available
Boiling point	Not available
Flammability	Not available
Lower explosion limit	Not available
Upper explosion limit	Not available
Flash point	Not available
Auto-ignition temperature	Not available
Decomposition temperature	Not available
SADT	
рН	5.7
pH solution	Not available
Viscosity, kinematic (calculated value) (40 °C)	160.55 mm²/s
Partition coefficient n-octanol/water (Log Kow)	Not available
Vapour pressure	Not available
Vapour pressure at 50°C	Not available
Density	1.09 g/cm <sup>3</sup>
Relative density	Not available
Relative vapour density at 20°C	Not available
Solubility	Not available
Viscosity, dynamic	175 mPa·s
Particle size	Not applicable

### 9.2. Data relevant with regard to physical hazard classes (supplemental)

No additional information available

## SECTION 10: Stability and reactivity

### 10.1. Reactivity

No additional information available

### 10.2. Chemical stability

Stable under normal conditions.

### 10.3. Possibility of hazardous reactions

No additional information available.

### 10.4. Conditions to avoid

Direct sunlight. Extremely high or low temperatures.

### 10.5. Incompatible materials

Strong acids. Strong bases.

### 10.6. Hazardous decomposition products

fume. Carbon monoxide. Carbon dioxide. Under normal conditions of storage and use, hazardous decomposition products should not be produced.

SECTION 11: Toxicological	SECTION 11: Toxicological information		
11.1. Information on toxicological	effects		
Acute toxicity (oral)	May be harmful if swallowed.		
Acute toxicity (dermal)	Not classified		
Acute toxicity (inhalation)	Not classified		
HUS4-MAX, A			
ATE UN (oral)	2095.382 mg/kg bodyweight		

# HUS4-MAX, A

Safety Data Sheet

according to the United Nations GHS (Rev. 9, 2021)

2-Propenoic acid, 2-methyl-, 1,4-butanediyl ester (2082-81-7)

Partition coefficient n-octanol/water (Log Kow)       3.1         1,1'-(p-tolylimino)dipropan-2-ol (38668-48-3)         Partition coefficient n-octanol/water (Log Pow)       2.1         2-Propenoic acid, 2-methyl-, monoester with 1,2-propanediol (27813-02-1)         BCF - Fish [1]       ≤ 100         BCF - Fish [2]       3.2 Quantitative structure-activity relationship (QSAR)         Partition coefficient n-octanol/water (Log Kow)       0.97 (OECD 102 method)         Bioaccumulative potential       Low bioaccumulation potential (BCF < 500).	Bioaccumulative potential	No additional information available		
Partition coefficient n-octanol/water (Log Kow)       3.1         1,1'-(p-tolylimino)dipropan-2-ol (38668-48-3)         Partition coefficient n-octanol/water (Log Pow)       2.1         2-Propenoic acid, 2-methyl-, monoester with 1,2-propanediol (27813-02-1)         BCF - Fish [1]       ≤ 100         BCF - Fish [2]       3.2 Quantitative structure-activity relationship (QSAR)         Partition coefficient n-octanol/water (Log Kow)       0.97 (OECD 102 method)         Bioaccumulative potential       Low bioaccumulation potential (BCF < 500).	2-Propenoic acid, 2-methyl-, 1,4-butanediyl	ester (2082-81-7)		
Partition coefficient n-octanol/water (Log Pow)       2.1         2-Propenoic acid, 2-methyl-, monoester with J-propanediol (27813-02-1)         BCF - Fish [1]       ≤ 100         BCF - Fish [2]       3.2 Quantitative structure-activity relationship (QSAR)         Partition coefficient n-octanol/water (Log Kow)       0.97 (OECD 102 method)         Bioaccumulative potential       Low bioaccumulation potential (BCF < 500).				
2-Propenoic acid, 2-methyl-, monoester with 1,2-propanediol (27813-02-1)         BCF - Fish [1]       ≤ 100         BCF - Fish [2]       3.2 Quantitative structure-activity relationship (QSAR)         Partition coefficient n-octanol/water (Log Kow)       0.97 (OECD 102 method)         Bioaccumulative potential       Low bioaccumulation potential (BCF < 500).	1,1'-(p-tolylimino)dipropan-2-ol (38668-48-3	)		
BCF - Fish [1]       ≤ 100         BCF - Fish [2]       3.2 Quantitative structure-activity relationship (QSAR)         Partition coefficient n-octanol/water (Log Kow)       0.97 (OECD 102 method)         Bioaccumulative potential       Low bioaccumulation potential (BCF < 500).	Partition coefficient n-octanol/water (Log Pow)	2.1		
BCF - Fish [2]       3.2 Quantitative structure-activity relationship (QSAR)         Partition coefficient n-octanol/water (Log Kow)       0.97 (OECD 102 method)         Bioaccumulative potential       Low bioaccumulation potential (BCF < 500).	2-Propenoic acid, 2-methyl-, monoester wit	h 1,2-propanediol (27813-02-1)		
Partition coefficient n-octanol/water (Log Kow)       0.97 (OECD 102 method)         Bioaccumulative potential       Low bioaccumulation potential (BCF < 500).	BCF - Fish [1]	≤ 100		
Bioaccumulative potential       Low bioaccumulation potential (BCF < 500).         4-tert-butylpyrocatechol (98-29-3)       1.98 (Experimental value, OECD 107: Partition Coefficient (n-octanol/water): Shake Flask Method, 25 °C)	BCF - Fish [2]	3.2 Quantitative structure-activity relationship (QSAR)		
4-tert-butylpyrocatechol (98-29-3)         Partition coefficient n-octanol/water (Log Kow)         1.98 (Experimental value, OECD 107: Partition Coefficient (n-octanol/water): Shake Flask Method, 25 °C)				
Partition coefficient n-octanol/water (Log Kow) 1.98 (Experimental value, OECD 107: Partition Coefficient (n-octanol/water): Shake Flask Method, 25 °C)	Bioaccumulative potential	Low bioaccumulation potential (BCF < 500).		
Partition coefficient n-octanol/water (Log Kow) 1.98 (Experimental value, OECD 107: Partition Coefficient (n-octanol/water): Shake Flask Method, 25 °C)	4-tert-butylpyrocatechol (98-29-3)			
Bioaccumulative potential Low potential for bioaccumulation (Log Kow < 4).				
	Bioaccumulative potential	Low potential for bioaccumulation (Log Kow < 4).		

# HUS4-MAX, A

Safety Data Sheet

according to the United Nations GHS (Rev. 9, 2021)

12.4. Mobility in soil		
HUS4-MAX, A		
Mobility in soil	No additional information available	
2-Propenoic acid, 2-methyl-, monoester with	1,2-propanediol (27813-02-1)	
Organic Carbon Normalized Adsorption Coefficient (Log Koc)	1.9 (log Koc, Calculated value)	
Ecology - soil	Highly mobile in soil.	
4-tert-butylpyrocatechol (98-29-3)		
Surface tension	No data available (test not performed)	
Organic Carbon Normalized Adsorption Coefficient (Log Koc)	1.37 (log Koc, OECD 121: Estimation of the Adsorption Coefficient (Koc) on Soil and on Sewage Sludge using High Performance Liquid Chromatography (HPLC), Experimental value, GLP)	
Ecology - soil	Highly mobile in soil.	
12.5. Other adverse effects		
Ozone	Not classified	
Other adverse effects	No additional information available	

SECTION 13: Disposal considerations			
13.1. Disposal methods			
Regional legislation (waste)	Disposal must be done according to official regulations.		
Product/Packaging disposal recommendations	After curing, the product can be disposed of with household waste. Full or only partially emptied cartridges must be disposed of as special waste in accordance with official regulations. Packaging contaminated by the product : Dispose in a safe manner in		
	accordance with local/national regulations.		
Ecology - waste materials	Avoid release to the environment.		

## **SECTION 14: Transport information**

ADR	IMDG	IATA	RID
I4.1. UN number or ID numbe	r	L	
Not regulated	Not regulated	Not regulated	Not regulated
14.2. UN proper shipping nam	e		
Not regulated	Not regulated	Not regulated	Not regulated
14.3. Transport hazard class(e	es)	-	
Not regulated	Not regulated	Not regulated	Not regulated
14.4. Packing group	-	1	
Not regulated	Not regulated	Not regulated	Not regulated
14.5. Environmental hazards		1	
Not regulated	Not regulated	Not regulated	Not regulated

according to the United Nations GHS (Rev. 9, 2021)

### 14.6. Special precautions for user

Overland transport Not regulated

Transport by sea Not regulated

Air transport Not regulated

Rail transport Not regulated

### 14.7. Maritime transport in bulk according to IMO instruments

Not applicable

# SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations specific for the product in question

No additional information available

SDS Major/Minor	None
Issue date	02/05/2023
Revision date	02/05/2023
Abbreviations and acronyms	CAS-No Chemical Abstract Service number ADN - European Agreement concerning the International Carriage of Dangerous Goods by Inland Waterways ADR - European Agreement concerning the International Carriage of Dangerous Goods by Road ATE - Acute Toxicity Estimate BCF - Bioconcentration factor BLV - Biological limit value BOD - Biochemical oxygen demand (BOD) CLP - Classification Labelling Packaging Regulation; Regulation (EC) No 1272/2008 COD - Chemical oxygen demand (COD) DMEL - Derived Minimal Effect level DNEL - Derived Minimal Effect level DNEL - Derived-No Effect Level EC50 - Median effective concentration EC-No European Community number ED - Endocrine disrupting properties EN - European Standard IARC - International Agency for Research on Cancer IATA - Indicative Occupational Exposure Limit Value LC50 - Median lethal concentration LD50 - Median lethal concentration LD50 - Median lethal dose LOAEL - Lowest Observed Adverse Effect Level NO.S Not Otherwise Specified NOAEC - No-Observed Adverse Effect Concentration NOAEL - No-Observed Adverse Effect Level NOEC - N

according to the United Nations GHS (Rev. 9, 2021)

OEL - Occupational Exposure Limit PBT - Persistent Bioaccumulative Toxic PNEC - Predicted No-Effect Concentration REACH - Registration, Evaluation, Authorisation and Restriction of Chemicals Regulation (EC) No 1907/2006 RID - Regulations concerning the International Carriage of Dangerous Goods by Rail SDS - Safety Data Sheet ThOD - Theoretical oxygen demand (ThOD) TRGS - Technical Rules for Hazardous Substances VOC - Volatile Organic Compounds TLM - Median Tolerance Limit vPvB - Very Persistent and Very Bioaccumulative WGK - Water Hazard Class None.

Other information

Full text of H-statements:		
H300	Fatal if swallowed	
H302	Harmful if swallowed	
H303	May be harmful if swallowed	
H311	Toxic in contact with skin	
H314	Causes severe skin burns and eye damage	
H317	May cause an allergic skin reaction	
H319	Causes serious eye irritation	
H400	Very toxic to aquatic life	
H402	Harmful to aquatic life	
H411	Toxic to aquatic life with long lasting effects	
H412	Harmful to aquatic life with long lasting effects
